Service Interruptions:

AT&T Fiber Cut, Humboldt/Mendocino Counties (New/Final)

On 10/24/17 at 1857 hours, the CSWC was notified by Humboldt County OES that there was an interruption of AT&T service that was affecting landlines and cell phone service. The CSWC made proper notifications and notified the Cal OES 911 Branch which began to provide regular updates regarding the situation:

- On 10/24/17 at 1946 hours the Cal OES 911 Branch reported:
 - The outage is an AT&T fiber cut that was caused by crews working in the area.
 - A repair of this type will typically take 7-10 hours.
 - A fiber cut can affect both wireline and wireless calls depending on what is connected using the fiber.
 - This fiber cut is primarily affecting all 9-1-1 calls in Mendocino County, wireless calls for Willits PD, wireless calls in the area north of Willits and some data connections.
 - PSAPs status:
 - Ukiah PD – Receiving 9-1-1 calls
 - Willits PD – They are receiving wireline calls, but not wireless calls. (this is a change from status sent earlier)
 - Mendocino SO – No calls – This center appears to be down. Anyone calling 9-1-1 in Mendocino County received a busy signal.
 - Humboldt CHP – Receiving 9-1-1 Calls
 - Humboldt SO – Receiving 9-1-1 Calls, CLETS is not working (data).
 - Del Norte SO –Receiving 9-1-1 Calls
- On 10/24/17 at 2116 hours the Cal OES 911 Branch reported:
 - The fiber cut in Northwest CA, is a data fiber optic cable cut that carries all the wireless service providers, AT&T Mobility, Verizon Wireless, T-Mobile, and Sprint.
 - Agencies in the affected area are able to receive landline 911 calls and transfer calls between agencies.
 - CHP Humboldt is the only agency not receiving any calls due to the CHP only taking Wireless calls.
 - The data cable cut affects Wireless calls, digital and VoIP calls as well.
 - Crews are on site repairing the cable now and have been for the last few hours.
 - According to AT&T the data cable damage is in part of the burn area in Mendocino County.
 - AT&T expected the cable to be repaired between 2300 hours and 0600 hours.

AT&T Fiber Cut, Humboldt/Mendocino Counties (Continued)

- On 10/25/17 at 0629 hours the Cal OES 911 Branch reported:
 - The Northwest Fiber Optic Data cable cut North of Willits was repaired on 10/24/17 at 2345 hours. Service was restored to all Wireless Service Providers: AT&T Mobility, Verizon Wireless, T-Mobile and Sprint.
 - All 911 Services have been restored back to normal operation in Northwest CA. The delay in reporting the final Fiber Cut repair was due to the remoteness of the Fiber Cut location.

WEATHER OF CONCERN

Weather of Concern

- Today will be another hot and dry day across the region as a strong ridge of high pressure remains over Southern California and light Santa Ana winds continue. Expect records to be broken again today. Please take precautions to stay cool and be aware of the critical fire weather risk as well.
- **Active Weather Warnings, Watches and Advisories by County:**
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** Very dry and quite unseasonably warm through this weekend ***

Except for the passage of a few weak low pressure troughs today and another one Sunday into Monday, high pressure will generally govern the weather pattern over the region through the middle of next week with dry, unseasonably warm weather continuing. Winds will generally be light into next week, but for at least the next few nights/early mornings, there will be some gusty N to NE winds develop for the Sacramento Valley areas and western slope areas of the Cascades and Sierra. The strongest gusts of those wind events will generally be around 25 mph but will probably reach 30-35 mph locally, particularly at the windiest locations along the western Sierra slopes. Temperatures will be 10-15 degrees above normal for some days yet with the warmest inland areas still in the 90s today followed by gradual cooling with highs falling down through the 80's into this weekend and then even a few degrees cooler early next week. Afternoon low Relative Humidity (RH) values will generally be 12-25%. The poorest overnight RH recoveries will be in the breezy areas and at some mid and upper slope locations at only 20-40%. A shallow marine layer and light onshore flow will provide for higher RH and some periods of fog or low clouds for many locations along the immediate coast.

SOUTHERN CALIFORNIA

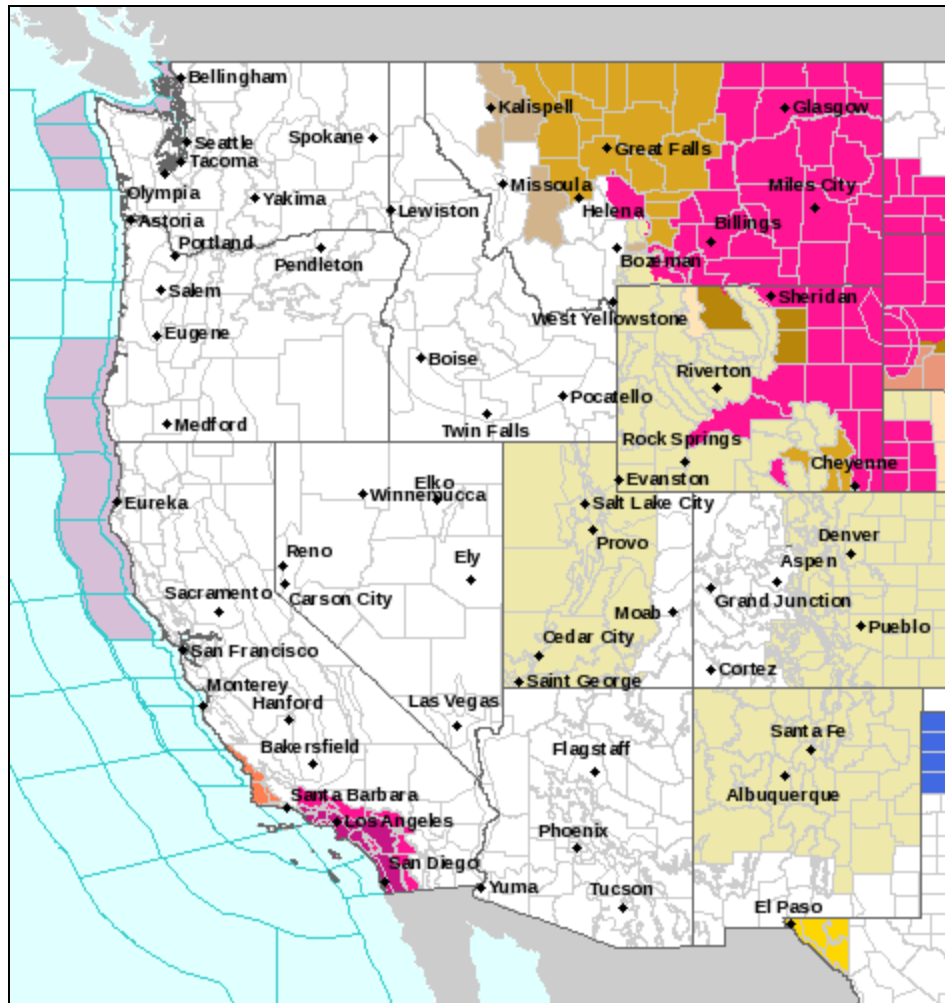

Continued hot and dry today

Winds decreasing over Southern California today

The offshore flow and associated winds will gradually weaken across Southern California today, however there will still be some gusty conditions with speeds in the 15-25 mph range this morning. It will continue to be hot and dry throughout the region with daytime highs in the 70s in the mountains, 80s across most of the inland areas of Central California, and in the 90s in the coastal and valley areas south of Point Conception. Humidity values will be 8 to 18% with some better recovery tonight as compared to previous nights. After today, high pressure will weaken which will help to lower temperatures by several degrees each day area wide but highs will still be above normal through the weekend. Some weak offshore flow is expected Friday and Saturday with light breezy conditions developing during the morning hours both days below the canyons and passes of Southern California. More substantial cooling is expected by the early part of next week as a trough begins to regain control over the Western United States.
